The University of Pittsburgh is very pleased to announce that an agreement has been reached with Thermo Electron Corporation (TMO).

Currently, this agreement includes all Thermo Electron Corporation’s Laboratory Equipment Division (LED) products; including popular brand names such as Forma, Sorvall, Revco, Heraeus, Savant, IEC, EC, Hybaid, LabSystems, CRS robotics and many other common products.

As a contracted supplier, TMO can offer the University of Pittsburgh researcher:

1) Contracted pricing

2) Simplified purchasing, which bypasses the bid process and eliminates sole source justifications for orders that exceed the $5,000 threshold. Orders exceeding $5,000 will be placed directly with TMO by the Purchasing Department.

3) Partnering with the #1 instrument manufacturer in the world.

Instrument Business Outlook (a strategic information journal for the Analytical & Life Science Industry) has chosen Thermo Electron Corporation (TMO) as their 2005 COMPANY OF THE YEAR.
